Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Project Title

HouseRent – MERN Stack House Rental Platform

Problem Statement

Finding a suitable rental house is often time-consuming because property information is scattered across different sources. Many rental platforms also lack a proper verification process for property owners, leading to fake listings and trust issues. Property owners face difficulties in managing listings and bookings efficiently, while administrators need an easy way to monitor users and approve genuine owners.

Objective

Develop a secure and user-friendly web application that connects tenants, property owners, and administrators on a single platform. The system provides verified property listings, secure authentication, online booking management, image uploads, and admin approval for owners.

Team Collaboration

- Discussed common problems faced in the rental housing market.
- Identified the need for a centralized rental management system.
- Collected ideas from all team members.
- Selected the House Rental Platform as the final project based on practicality and real-world demand.

Platform Feature Guide

Use this guide to understand the complete functionality of the HouseRent platform. It covers User, Owner, and Admin capabilities, showing how the multi-user system operates to manage property rentals.

6 User features, 8 Owner features, 6 Admin features.

1 User role →

Browse properties, register/login with JWT, book a stay, manage profile. All details are accessible and protected.

5 minutes

User role →

Browse properties, register/login with JWT, book a stay, manage profile. All details are accessible and protected.

Owner role →

Register (Admin approved), add properties, upload images via Cloudinary, manage bookings. Full control over listings.

A User Login

Define who participate far the session and sent pre-work ahead.

B Owner Registration

Think about the problem you'll be focusing on solving in the brainstorming session.

C Property Listing

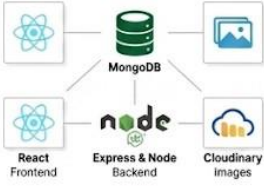

Use the Facilitation Superpowers to run a happy and productive session.

[View detailed screenshots →](#)

2 Admin role →

Admin Dashboard, view all users and properties, approve/reject owners, monitor all activity. Ultimate oversight of the system.

3 minutes

Admin control points

- Users and Properties
- Bookings
- System Health

Step-2: Brainstorm, Idea Listing and Grouping

Ideas Generated

- User Registration and Login
- JWT Authentication
- Role-Based Access Control
- Owner Registration
- Admin Approval for Owners
- Add, Edit and Delete Properties
- Upload Multiple Property Images
- Browse Available Properties
- Property Details Page
- Book Rental Properties
- Booking History
- Forgot Password via Email
- Reset Password
- Profile Management
- Admin Dashboard
- Manage Users

- Manage Properties
 - Manage Bookings
 - Secure Password Encryption
 - Cloudinary Image Storage
 - Responsive User Interface
-

Grouped Ideas

User Features

- Register/Login
- Browse Properties
- View Property Details
- Book Properties
- Booking History
- Edit Profile
- Forgot & Reset Password

Owner Features

- Owner Registration
- Admin Approval
- Add Property
- Edit Property
- Delete Property
- Upload Images
- View Property Bookings

Admin Features

- Manage Users
- Approve/Reject Owners
- Manage Properties
- Manage Bookings
- Monitor Platform Activities

Security Features

- JWT Authentication
- Password Encryption (Bcrypt)
- Protected Routes
- Role-Based Access Control

Technology Features

- MongoDB Database
- Express.js Backend

- **React Frontend**
- **Node.js Server**
- **Cloudinary Image Upload**
- **Nodemailer Email Service**

Step-3: Idea Prioritization

Priority	Feature	Reason
High	User Authentication (JWT)	Secure login and access control
High	Browse Properties	Core functionality for users
High	Property Booking	Main purpose of the application
High	Owner Property Management	Allows owners to manage listings
High	Admin Approval System	Prevents fake property owners
High	Admin Dashboard	Platform monitoring and management

Medium	Image Upload (Cloudinary)	Better property presentation
Medium	Booking History	Helps users track bookings
Medium	Forgot & Reset Password	Improves user convenience
Medium	Profile Management	Allows users to update personal details
Low	Search Filters	Can be added in future versions
Low	Wishlist	Future enhancement
Low	Reviews & Ratings	Future enhancement
Low	Notifications	Future enhancement
Low	Live Chat	Future enhancement
Low	Online Payment Integration	Planned future feature
Low	Analytics Dashboard	Future improvement for admin

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
